

In the article of the journal which was published in the second issue in 2019 under the title of “Early and mid-term results of frozen elephant trunk procedure for acute type A aortic dissection” (2019;27(2):135-142), the first sentence in the fifth paragraph in the Results section was erroneously stated as follows:

“Data of 24 patients were compiled for follow-up until January 2018 and only one patient died during follow-up.”

The corrected version of this sentence is as follows:

“Data of 33 patients were compiled for follow-up until January 2018 and only one patient died during follow-up.”

Please accept our apology for this inconvenience.

Sincerely,
